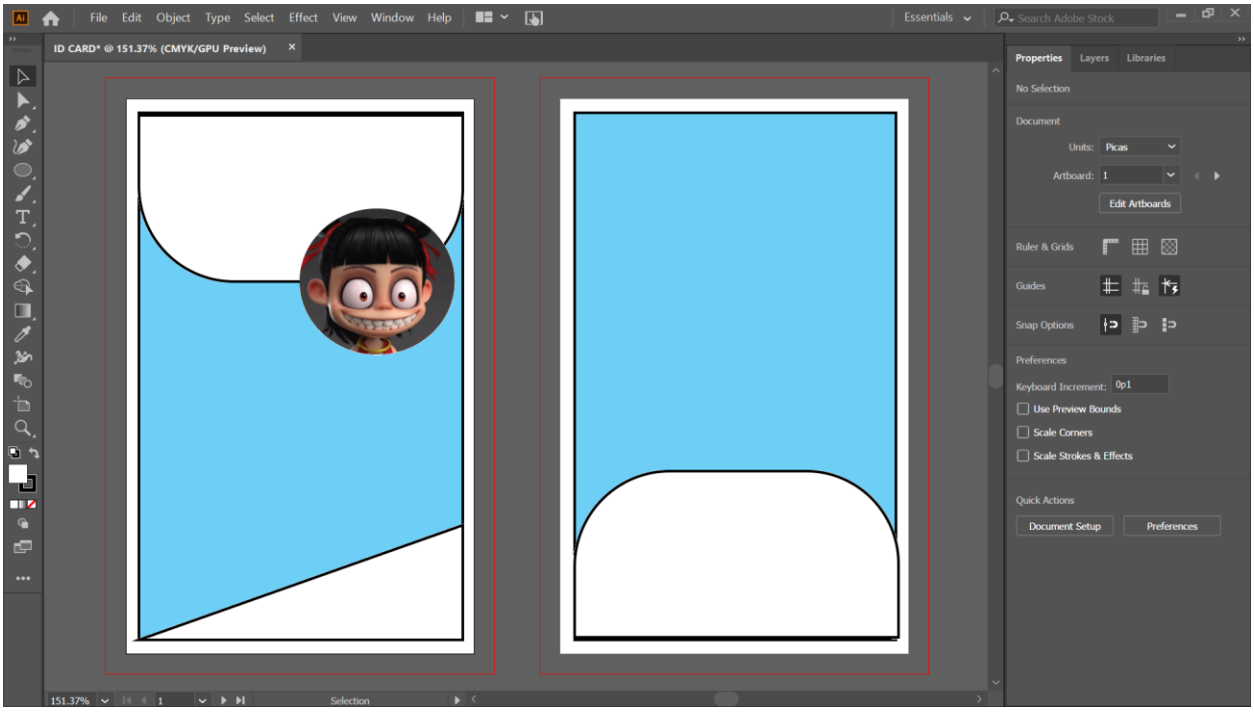
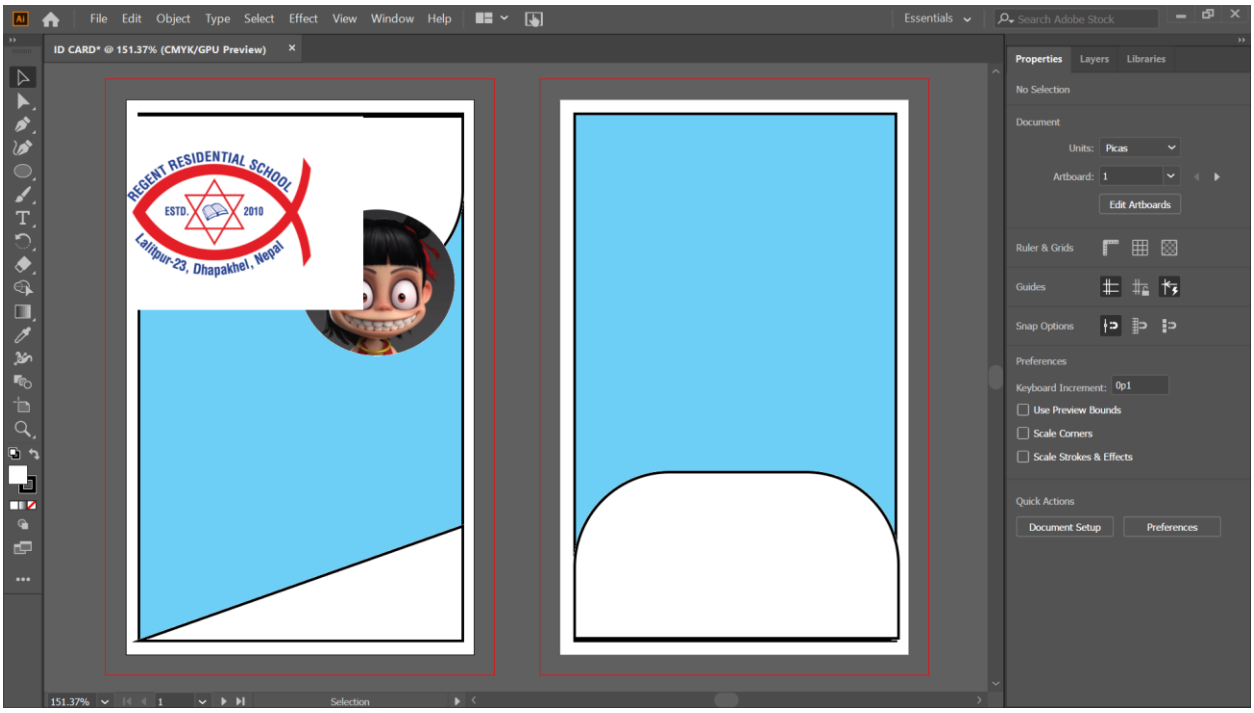
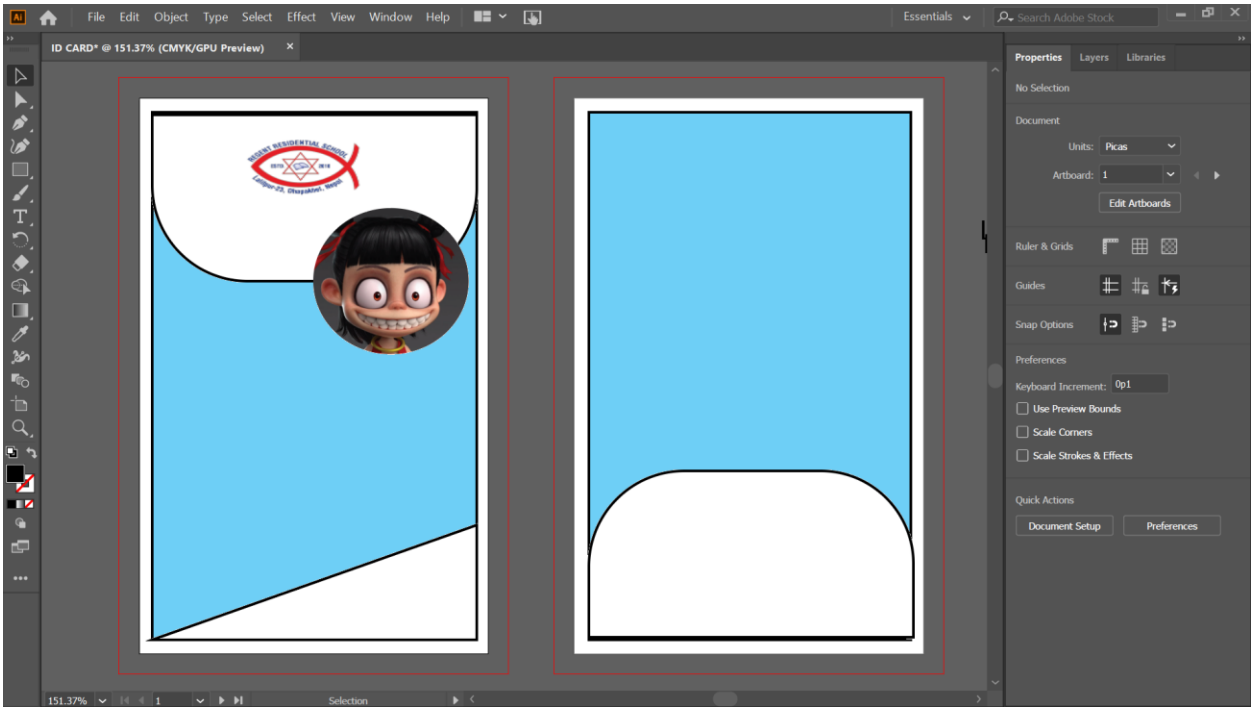
Drag paint tool from one end to diagonal then release mouse then again drag from that diagonal end point to lower end point then release mouse then again do same from where you started. Then you will get as below



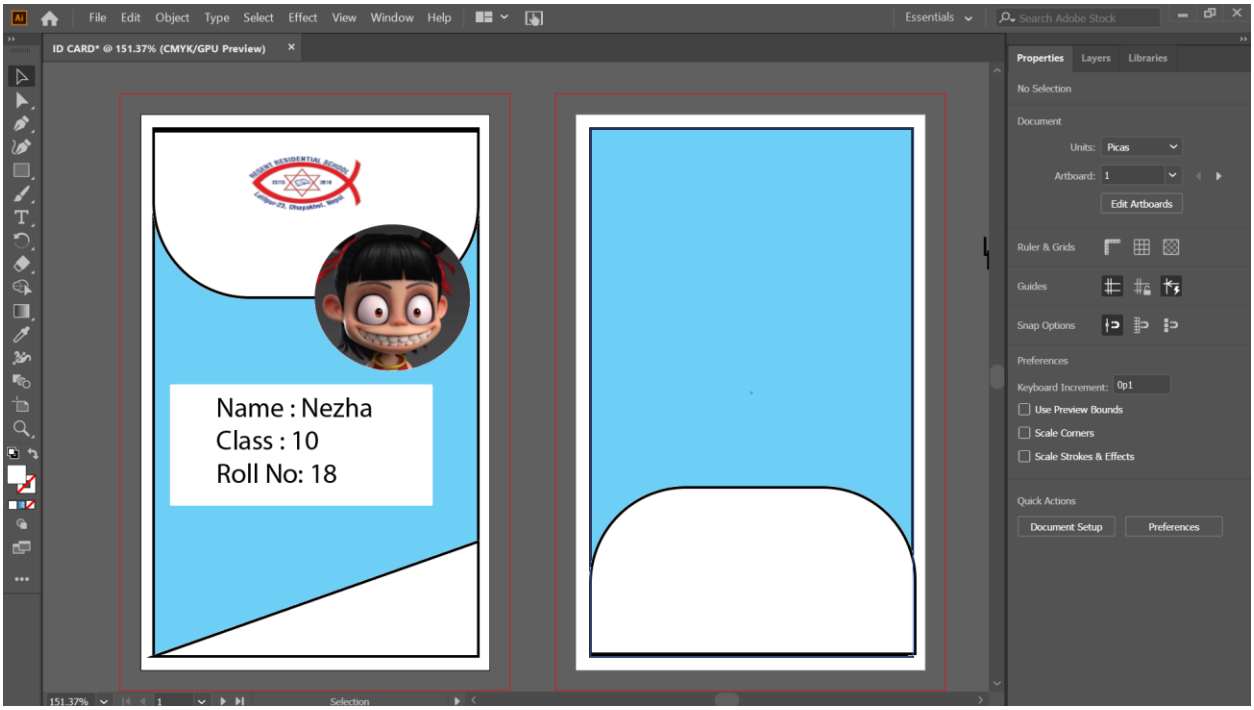
Then place the college or organization logo in the semi-circle as below

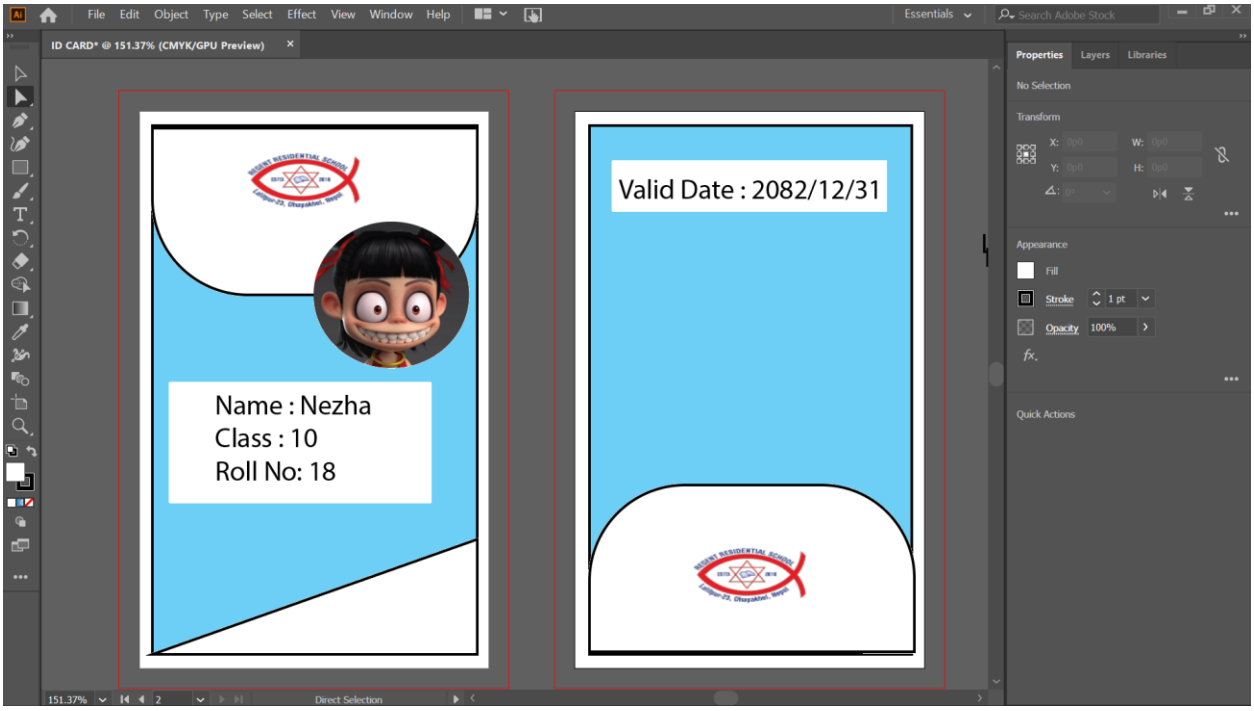


Resize the logo to fit in the semicircle



To add first create a rectangle “M” then drag where you want to place it and to make text press “T” then write the details as below





Conclusion:

We successfully created an ID card using Adobe Illustrator by using basic tools such as Ellipse Tool, Paint Tool, and Text Tool. We used a clipping mask to fit the photo into a shape, added a logo inside a semicircle, and placed text details using the Type Tool. This process helped us understand shape manipulation, layering, and text formatting in Illustrator.
